

**Product Announcement**

**New SD355CO Fire/CO Detector and CELL-CAB-FL Cell Communicator**

April 2018

Fire-Lite Alarms is pleased to announce the availability of our new SD355CO addressable combination fire and CO detector for use with the Endurance Series (ES-50X and ES-200X) fire alarm control panels (FACPs). This multi-criteria detector uses four sensing technologies (photoelectric, infrared, heat and CO) to accurately detect fire and CO alarm conditions with a high immunity to false alarms and can send separate signals for fire and CO to the FACP.

In addition, we are also announcing the availability of the CELL-CAB-FL cellular communicator. Like the CELL-MOD cellular communicator released last month, the CELL-CAB-FL adds cellular reporting capability to the Fire-Lite Endurance Series FACPs providing dual path cellular and IP reporting when used together for increased reliability. The CELL-CAB-FL includes a metal enclosure with a lock and key and an external antenna while the CELL-MOD is housed in a plastic enclosure and does not include a lock or external antenna.

**The SD355CO and CELL-CAB-FL are available to order now!** Please contact your Customer Service Representative at 800-627-3473 for ordering and pricing information and visit [firelite.com](http://firelite.com) for more information.

Model Number	Description
SD355CO	Addressable Combination Fire/CO Detector
CELL-CAB-FL	Cellular Communicator for ES FACPs (metal housing with lock and key)

We appreciate your business and continued support of Fire-Lite Alarms products.

Thank you,
